AARON R MILLER

Fullstack Software Developer

@ amiller@watheia.com
 watheia.com

 Kennewick, WA

CLIFTON STRENGTHS™

INDUSTRY EXPERIENCE

Insight Global

W2/Contractor

Nov 2022 - Ongoing

Engineering contractor at staff-augmentation agency

Alpha Medical

- Caused an increase in positive TrustPilot reviews to a daily average of ten, up from near zero, by designing and implementing a full-stack architecture for a customer engagement platform in a telemedicine application (HIPAA, Programming, Braze, AWS, Python, Flask, Nodejs, React)
- Led to the successful transition away from a transactional MailChimp API to an event-based customer engagement platform by developing a two-month migration strategy and leading a team of three other engineers to carry it out (HIPAA, Leadership, Programming, Braze, MailChimp, REST, Python, Nodejs, React)
- Improved UX for consult scheduling by surfacing the provider's alternating two-week schedules in the front end and providing real-time feedback in the calendar widget (Programming, UX, Nodejs, React)

Watheia Labs, LLC

Self

苗 Jun 2019 - Nov 2022

Co-founder and chief technical lead at digital agency

Watheia Labs

- Created a serverless double-entry bookkeeping solution with an immutable append-only transaction ledger. (Programming, Serverless, DevOps, REST, Oauth2, AWS, Lambda, QLDB, Nodejs, HTML5)
- Implemented secure backend for public contact service using a throttled API Gateway and Lambda function for real-time notification delivery (Programming, Serverless, DevOps, SendGrid, Lambda, Amazon SNS, DynamoDB, Typescript, Nordeic)
- Completed research, planning, and prototyping phases of a New Product Development (NPD) plan for a Platform as a Service (PaaS) product (NPD, DevOps, Serverless, Digitalocean, AWS, GCP, Kubernetes, GitLab, RancherOS, Docker, K3S, Istio, Terraform, Vault, Cloud Native Buildpacks, Python)

"After many years an awesome developer has finally decided to step up and share the burden of bringing this plugin to its next stages: thanks Aaron R. Miller for your contributions, but above all, thanks for your enthusiasm and for reinvigorating the project!"

- Roberto Lo Giacco, AgileWare Co-Founder

Stackbit.com

- Developed and integrated a full-featured text editor for, Stack-bit.com with support for basic text formatting, rich data tables, hot-links, mentions (@username), custom components support, auto-format markdown symbols, soft/hard breaks, and auto-format on paste (deserialization) for; DOCX, HTML, Markdown, and CSV content. [2] (Programming, UX, React, TypeScript, Nodejs, Slate)
- Fixed design flaws in 'stackbit-target-nextjs' [2] that prevented proper caching (change detection) and parallelization within a monorepo build. [3] (Programming, Typescript, Nodejs, Nx)

Auto-DevOps.com

- Created prototype PaaS serverless infrastructure on Digitalocean droplet with RancherOS running K3S preconfigured and optimized for Auto-DevOps workflows using KNative + Istio + GitLab Runner (DevOps, Serverless, Digitalocean, Kubernetes, Knative, Terraform, Postgres, GitLab CI)
- Created a working prototype for multi-project build leveraging cloud-native buildpacks for Auto-DevOps. [3] (DevOps, Serverless, Kubernetes, Python, Microservices, GitLab CI)

Xtext

- Implemented AbstractCodeMiningTest and AbstractMultiQuickfixTest to provide a convenient way to test the code mining and multi-quickfix capabilities within Xtext [4] (Programming, Java, Xtext, ANTLR, LSP, Junit)
- Extended example projects and the Xtend code base to demonstrate the usage of these framework classes (Programming, Java, Xtext, ANTLR, LSP, Eclipse, Junit)

Natural

 Added LSP support to Natural; An eclipse plugin for Cucumber and JBehave [5] (Programming, Java, Xtext, ANTLR, LSP, Eclipse, Groovy, Cucumber, JBehave, BDD)

Cartoonifylt

- Developing an Augmented Reality (AR) demo application with Rust and Android NDK [6] (Programming, Mobile, Android, C/C++, Rust)
- Ported Android NDKCamera SDK from C++ to Rust and released as a standalone crate (Programming, Mobile, Android, C/C++, Rust)

Expedia Group

W2/Contractor

Nov 2018 - Jun 2019

DevOps Systems Engineer at Expedia Group (WAVSYS)

Systems Engineer II

- Reduced maintenance cost by aiding in the transition of a legacy monolith project to a more modern automation framework Programming, DevOps, StackStorm, Vault, ServiceNow, Microservices, Kubernetes, NET, Python)
- Improved the efficiency of Stackstorm pack development by building and maintaining an automated acceptance testing and specification framework (Programming, Build Systems, StackStorm, Vault, Gradle, BDD, Java, Groovy, Python, Serenity)

Catalyte-Surge IT Services

1099/Contractor

React, Redux)

Oct 2017 - Jun 2018

General contractor at staff augmentation firm

Electronic Medical Records App

 Removed primary blockers and reduced runtime memory footprint by an order of magnitude in an Electronic Medical Record (EMR) web application (Programming, Microservices, REST, Nodejs, HTML5, ES6, Babel, Flow, Express,

TOP ACHIEVEMENTS

Volunteer Work

Laid underground sprinklers and built pipe valve mechanisms at Richland Children's Center; Read blueprints and directed volunteer work crew to construct wooden playground equipment at Playground of Dreams

Earned 3 college credits in Mathematics and 2 credits in Computer Science through the Advanced Placement program at Plano East Senior High

National Forensics League

Won multiple trophies in varsity debate for out-of-state competitions and tournaments at Plano East Senior High

DiggCharts

Wrote the DiggCharts application which won second place in the Digg.com Data Visualization Contest

GMailFS HOWTO

Wrote and published "GMailFS HOWTO: Guide to Using Your GMail Account as a Linux File System" [7]

AllStudentRentals.com

Developed the flagship product for winner of the "Best Business Idea" contest at California State University

NuLabel Technologies

Worked with Director of Science to develop database-driven software systems that replaced existing spreadsheet-based workflow in use by the lab techs; Later bundled and sold as COTS product.

Vivid Learning Systems

Developed prototype mobile VR appused by the sales team to entice potential customers at trade shows

OpenAl Beta

Applied for and approved to join the early-acesss beta program for the OpenAI GPT3 release

Gradle Resume

Developed gradle plugin to publish an interactive resume pdf with custom skill-points calculator and data visualization from a custom domain model [8]

Emory University 2FA

Developed client side module and build release system for custom 2FA authentication, when using the AWS Command Line
 Interface within Emory University's internal network (Programming, AWS,
 Microservices, SOAP, Gradle, Spring, Java, Groovy, EAR)

Vivid Learning Systems

W2/Fulltime

iii Oct 2010 - Apr 2017

Software developer for "eLearning" products and services company

Sr. Programmer

- Developed prototype mobile VR app used by the sales team to entice potential customers at trade shows (Programming, Mobile Apps, C/C++, Java, Android NDK, Google VR, GearVR (Oculus), Unreal Engine)
- Automated workflow for production department and drove the adoption of Continuous Integration into the development pro-Cess Programming, Build Systems, DevOps, Systems Integration, Java, Groovy, Gradle, Python, OSGI, Jenkins, Eclipse
- Designed and developed front end framework to enable the production of Computer Aided Learning content as a fully Progressive Web App, eliminating the reliance on Flash/Air runtimes in flagship product (Programming, Microservices, UI/UX Design, Progressive Web App, Javascript, HTML5, Closure Compiler, Underscore, ¡Query Mobile, CreateJs, Nodejs)
- Created prototype data service-oriented back-end architecture
 that supports user authentication and tracking for deployment
 scenarios outside a traditional LMS web portal, later adopted
 by another team as the basis for a rewrite to the backend LMS
 product (Programming, Microservices, RPC, C#/NET, Entity Framework)

Programmer II

- Implemented mobile-compatible front-end architecture to bring a flagship product to the App/Play Store (Programming, Mobile Apps, UI/UX Design, Flash/Flex, Adobe Air, Python, Apache Ant)
- Maintained existing flagship product that delivers and tracks the usage of rich media content for the purpose of Computer Aided Learning ("eLearning") (Programming, Flash/Flex, Actionscript, SCORM)

Open Base Ineractive / Splash Labs

Self

i Jul 2007 - Feb 2011

Co-founder and chief technical lead at digital agency (previously dba "Splash Labs, LLC")

NuLabel Technologies

 Worked with Director of Science to develop database-driven software systems that replaced existing spreadsheet-based workflow in use by the lab techs (Product Development, Business Analysis, DevOps, RPC Service, Programming, UI/UX Design, Java, Tomcat, Google API, Flex, Actionscript, Postgres, Python, Jenkins, Data Visualization)

Demand Lending

- Designed and developed the software systems for flagship product of a Direct Lending startup (Product Development, Business Analysis, Systems Architecture, UML Modelling, Use Case Analysis)
- Managed a team of developers to bring flagship product to market (Project Management)

All Student Rentals

 Created client-server marketplace of rental properties for the winner of the "Best Business Idea" contest at California State University (Product Development, Programming, UI/UX Design, Flash/Flex, RPC, PHP, AMF3, Yahoo! Maps, Google Analytics. HTML5)

 Integrated phone service with back-end systems to automatically detect billable leads, through the use of auto-generate extension numbers shown in the front-end app, keyed by listing and vendor ID (Programming, Systems Integration)

Team08

- Developed Fullstack system to enabled custom snowboard designs to be created and purchased online (Programming, UI/UX Design, Flash/Flex, RPC, PHP, Magento, Databases)
- Integrated back-end database systems with CAD manufacturing systems to automatically produce working specs from the webbased designer utility in the store front-end. (Programming, Systems Integration)

Digg.com

 Created the "DiggCharts" app which won second place in the Digg.com API data visualizations contest (Programming, Flash/Flex, UI/UX Design, Digg API, Data Visualization)

North Coast Credit Union

W2/Fulltime Feb 2006 – Jun 2007

Loan Officer at a local credit union

HSBC

W2/Fulltime # Apr 2004 - Oct 2005

Funding analyst for subprime auto loans

Capital One

Funding analyst for subprime auto loans (intern)
